## **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: Claims 1-4 are allowed.

Claims 1 and 4 are allowed because the prior art of record fails to disclose or suggest the inclusion of an edge counter which generates a value equal to the sum of the positive and negative edges and when the value reaches a predetermined value Q, an output generator generates a reset signal to start the counting as recited in claim 1. The inclusion of an edge counter having a structure which provides a value equal to the sum of the positive and negative edges and the generator generates a reset signal to reset the counting when a value Q is reached defines patentability over the prior art of record because it defines a distinguished structure of the edge counter which is not taught by the prior art of record, alone or in combination. The closest prior art of record, US Patent No. 5,614,869 does not teach the counting of both of the positive and negative edges to provide a value equal to the sum of the positive and negative edges, US Patent No. 6,861,881 does not teach a structure of the edge counter to provide a value equal to the sum and the output generator does not generate a reset signal.

Claims 2 and 3 are allowed for the same reason noted in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
